Childhood cancer stats

- 1,700 new cases of childhood cancer diagnosed annually in Canada
- 1 in 5 children diagnosed with cancer in Canada do not survive
- 60% of survivors face late effects of their disease and treatment
- Only 3% of cancer research funding in Canada is dedicated to childhood cancer

Kaps4Kids

is a grassroots awareness and fundraising program enabling community-minded individuals, groups, schools, and businesses to make a difference in their local communities

For one day and a \$1 minimum donation per participant, you can wear a cap, hat, fedora, scarf, or whatever you would like on your head to show your support for kids with cancer, who also wear these during chemotherapy as their hair begins to fall out

All funds raised directly support OPACC's programs that help childhood cancer families across Ontario each and every day!

About OPACC

Since 1995, Ontario Parents Advocating for Children with Cancer (OPACC) has been making a difference in the lives of children and families affected by childhood cancer across Ontario through our Parent Liaison in-hospital support program at SickKids, community support through local parent support groups, and advocacy efforts through our collaboration with other childhood cancer organizations
